DETAILED ACTION

Examiner's Note

1. The Examiner has pointed out particular references contained in the prior art of record in the body of this action for the convenience of the Applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claims, other passages and figures apply as well. It is requested from the Applicant, in preparing the response, to consider fully the entire references as well as the context of all passages in the cited references as potentially teaching all or part of the claimed inventions.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. **Claims 1-6** are rejected under 35 U.S.C. 102(e) as being anticipated by Brookner et al., US Patent No. 6,009,417.

As per **claims 1, 3, and 5**.

Brookner discloses

A [system/computer readable medium/method] for controlling a franking machine from a remote computer (Abstract; Summary of the Invention), comprising:

Art Unit: 3621

control software for controlling said franking machine (Fig 1-9B, associated text; C2, L43-65; C3, L30 – C4, L8; C5, L23-38; C7, L16-54);

communications apparatus for said franking machine to communicate with said computer (same citations);

a user application operating on said computer to interface with said control software via said communications apparatus (same citations); and

a programming library for communicating with said user application, said programming library providing said user application with a series of functional controls of said franking machine (same citations).

As per claims 2, 4, and 6.

Brookner discloses all the limitations of claims 1, 3, and 5 respectively.

Brookner further discloses

said functional controls include at least one item selected from the group consisting of connection, configuration, actions, departments and statistics (see above citations; C3, L12-16: "audit information and reports").
